

B. APPLICANT'S COMMENTS

The Applicant has amended the claims to clarify that the "plurality of second connectors extending out from said thermal management unit." The Wall et al. reference clearly does not teach the usage of second connectors that are "extending out from said thermal management unit" or the overall functionality of the present invention where a thermal management unit is removably connectable to a socket.

For these reasons, among others, Wall cannot suggest the combination of features in applicant's Claims 1-4, 11-28, and it is therefore submitted that the rejection against these claims should be withdrawn and Claims 1-4, 11-28 be allowed.

C. CONCLUSION

In light of the foregoing amendments and remarks, early reconsideration and allowance of this application are most courteously solicited. Should the Examiner consider necessary or desirable any formal changes anywhere in the specification, claims and/or drawing, then it is respectfully asked that such changes be made by Examiner's Amendment, if the Examiner feels this would facilitate passage of the case to issuance. Alternatively should the Examiner feel that a personal discussion might be helpful in advancing this case to allowance, they are invited to telephone the undersigned.

Respectfully submitted,

Michael S. Neustel (Reg. No. 41,221)
